LeetCode

## Career Objective

Dedicated Artificial Intelligence and Data Science student with a strong foundation in Python, SQL, Data Structures, and Machine Learning. Passionate about solving real-world problems through innovative technology solutions. Regularly solve Data Structures and Algorithms problems on LeetCode to strengthen coding and analytical skills. Seeking an entry-level opportunity to contribute, learn continuously, and grow in a dynamic organization.

## Academic Qualifications

|                                                          |                  |
|----------------------------------------------------------|------------------|
| <b>B.Tech Artificial Intelligence &amp; Data Science</b> | 2023-2027        |
| CMS College of Engineering                               | <b>CGPA:8.18</b> |
| <b>Higher Secondary Certificate (HSC)</b>                | 2021-2022        |
| Vidhya Vikas Matric Hr. Sec. School                      | <b>78%</b>       |
| <b>Secondary School Leaving Certificate (SSLC)</b>       | 2019-2020        |
| Christ Matriculation School                              | <b>98%</b>       |

## Technical Proficiencies

- Programming Languages: Python, SQL, DSA
- Database: MySQL
- Core : Data Structures, DBMS, OOPs
- AI Technologies: Machine Learning, Deep Learning, Data Analytics
- Tools: GitHub, VS Code, MS Office
- Libraries: NumPy, Pandas

## Technical Projects

**AI-Based Medical Report Analyzer** *Technologies: Python, ML, Pandas, NumPy, Scikit-learn*

- Developed an AI-based application to analyze medical reports and classify patient health conditions into Low, Medium, and High Risk categories.
- Applied Machine Learning techniques to improve health risk prediction and support clinical decision-making.

**Alumni Management Platform** *Technologies: Python, Flask, HTML, CSS, JavaScript, MySQL*

- Developed a web-based platform for alumni registration, profile management, and event participation.
- Improved alumni communication and institutional engagement through a centralized system.

**LUDO Game** *Technologies: Python*

- Developed a terminal-based LUDO game with dice rolling, player movement, and winner detection.
- Implemented game rules, turn-based gameplay, and winner detection using Python.

**Snake Game** *Technologies: Python*

- Built a terminal-based Snake Game with real-time movement, food generation, and score tracking.
- Implemented snake movement, collision detection, and game-over functionality using Python.

## Achievements & Interests

- Presented a research paper on Federated Learning using Artificial Intelligence at a Technical Symposium.
- Regularly solve LeetCode Data Structures and Algorithms problems to strengthen problem-solving skills.
- Completed workshops on Robotics, Computer Vision, and Power BI.
- Actively participated in coding sessions and continuous technical learning programs.

## Training & Certifications

- **NPTEL Cloud Computing (12 Weeks) – Elite**  
Gained knowledge of cloud computing concepts, virtualization, and cloud service models.
- **Robotics Workshop – IIT Research Park**  
Acquired practical knowledge of robotics, automation, and embedded systems.
- **Computer Vision Workshop – IIT Research Park**  
Learned image processing and AI-based computer vision techniques.
- **Power BI Workshop – Kongu Nadu College of Engineering & Technology**  
Developed skills in data visualization, dashboard creation, and business analytics.
